Subject: Microsoft Settlement

MOcrosoft is a leader in the technology field and needs to have the freedom to do what it does best. That is to improve the computer technoligy for everyones use. If there are a few who do not wish to use this technology from Microsoft they can chhose to disregard what has and is being made available for the consumer. The consumer has the ability to decide what to use at home and at the workplace. Our government should not interfere with private enterprise and the the ideas of Microsoft or any company. The marketplace is where the decisions should be made aabout who wants to use what products. This lawsuit is frivilous. Thank you.
